TO ASSURE SAFETY, TURN OFF ELECTRICAL POWER WHILE INSTALLING THIS UNIT.

1. Pull power source wires through center of adapter plate.
2. Attach adapter plate (#16509) to 3 1/2" wall mounted octagon box (not included) with two screws that come with the octagon box. Before tightening, make sure that the adapter plate is plumb, by placing a level on the flat side of the adapter plate, then tighten screws.
3. Place anchor plates on post top fitter using the springs and two screws (#15034). See drawing (A). Tighten the screws temporarily to hold anchor plates in place.
4. Connect white wire from power source to the white wire of the wall sconce with wire nut (not included).
5. Connect black wire from power source to the black wire of the wall sconce with the wire nut (not included).
6. Feed Excess wire into wall sconce.
7. Attach wall sconce to the adapter plate using two screws (#15033).
8. Place globe over anchor plates one at a time, then finish tightening the two anchor plate screws (#15034).

GLOBES THAT ARE AVAILABLE WITH THE WALL SCONCE
